

Checklist Furniture Removal

Important to consider

When your move approaching, these points are good to keep in mind:

- If necessary, you can rent moving cartons with us at a price of 20SEK/Pcs. We use professional cartons and they have a different quality than the supermarket.
- Report change of address to post, banks, insurance companies, tax authorities, newspaper. Tel Change of address 0771-979899 or www.adressandring.se
- Order the move of your phone and electricity.
- Go through basement, garage, storage, etc. and sort and discard. Pack as much as possible in real moving cartons.
- Collect all the small items of larger values such as jewellery, bank books, valuables etc. These things are taken in your own hand luggage during the moving day.
- Pack clothes, books and other things you don't need in the near future.
- Go through kitchen-ware, pack porcelain and glass, clean shelves and cupboards, pick down curtains.
- Roll up carpets, collect keys to the old home and make sure you have the key to the new home easily accessible.

Packing:

- Gather things that will be necessary directly in the new home such as toilet articles, bedding, etc. pack things in cartons that you can bring yourself in the car or label the cartons extra clear and ask the removal staff to pack them last in the car.

Packtips for a smoother, simpler and cheaper move

Think of ALWAYS stacking the heaviest at the bottom so the upper cartons can't tumble down.

Sort, throw and sell:

- Be sure to sort, throw and sell things as early as possible. In the new home you may not want to have all the things you have now.

Pack in good time:

- Start packing well in advance. Better to see full cartons in the home than to have full up to make the last day.

Packing in Cartons:

- Fill only half the carton with, for example, books or other heavy items and the rest with bedding, pillows, etc. Do not pack so the holes where the hands are inserted in is cover. Max 30kg per carton.
- NEVER fill a cardboard box with books, it's neither good for the cartons or the person who carries its.

Carton labelling:

- Label the cartons with which room the carton should be in the new accommodation and what is in it. Put the label on two sides and not on top of the carton.
Note! Please write on masking tape to avoid typing directly on the box.
(If You rent from us, do not write on cardboard but only on masking tape that you can easily remove.)

Stack the cartons:

- Set up and in order all the cartons so it is easy for us to just download on the moving day, preferably near the front door as possible.

Shelves and Wardrobes

- Take loose shelves and stack these and tie together, with string, FLYTTEJP o stretch film. Put the shelves in a bag.

Carpets and Mattresses:

- Roll up carpets and mattresses and tie them with laces or with straps.

Long objects:

- Long objects such as skis, curtain, etc. can be bundled together with string, straps or Removable tape.

Fragile Items:

- This applies to glass and porcelain that shell stuff standing in the moving cartons with toor blankets in between. Be sure to label the cartons with “warning-tape”.

Mirrors, paintings, crystal chandeliers, etc.:

- Mirrors, paintings and similar objects must be wrapped and all light-bulb unscrewed.

Keep in mind that all that is fragile must be wrapped so that it not will be able to break during the move and transport.

Are you unsure and have questions about the move?
